HAL — A Maharatna CPSE

THEME

Electrical & Electronics Ecosystem for Aerospace & Defence Needs, Capabilities & Opportunities

Seminar Highlights

Seminar Focus Areas:

- Avionics and embedded systems
- Power electronics
- Electrical systems
- Electronic warfare
- Sensors
- Communication systems
- Data systems
- AI-enabled electronics
- Advanced testing and simulation
- High-reliability electronics
- Indigenous components
- Manufacturing technologies
- Future aerospace & defence requirements

Why Your Organisation Should Participate

- Gain insights into emerging electrical, electronics and avionics technologies for aerospace and defence.
- Interact directly with senior professionals from HAL, ECIL, DRDO, BDL, ISRO, Brahmos and other leading organisations.
- Understand opportunities for indigenous development, localisation and technology collaboration.
- Explore potential vendor development, partnerships and business opportunities within the aerospace, space and defence ecosystem.
- Exchange experiences and best practices in design, manufacturing, testing, certification, reliability and lifecycle support.
- Network with technology developers, system integrators, OEMs, DPSUs and fellow industry leaders.
- Identify opportunities arising from Make in India, Atmanirbhar Bharat and the growing demand for indigenous aerospace and defence electronics.
